### DETAILED ACTION

The preliminary amendment filed 09/05/2003 has been entered. Claims 20–27 are pending.

#### *Election/Restrictions*

5           This application contains claims directed to the following patentably distinct species:  
Activin, a partially modified form of activin, an inhibitor of metabolism of activin, or a  
stimulator of synthesis of activin. The species are independent or distinct because the species are  
not so closely related that a search and examination of the entire claimed invention can be made  
without serious burden. The species do not share a substantial structural feature essential to a  
10   shared common utility. The species are so unrelated and diverse that a prior art reference  
anticipating the claim with respect to one species would not render the claim obvious under 35  
U.S.C. 103 with respect to the other species.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for  
prosecution on the merits to which the claims shall be restricted if no generic claim is finally  
15   held to be allowable. Currently, claims 20–22 and 25–27 are generic.

Applicant is advised that a reply to this requirement must include an identification of the  
species that is elected consonant with this requirement, and a listing of all claims readable  
thereon, including any claims subsequently added. An argument that a claim is allowable or that  
all claims are generic is considered nonresponsive unless accompanied by an election.

20           Upon the allowance of a generic claim, applicant will be entitled to consideration of  
claims to additional species which depend from or otherwise require all the limitations of an

Art Unit: 1647

allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37

5 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

10 Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.
